1. The following is an examiner's statement of reasons for allowance:

As previously stated, the prior art of record fails to teach or render obvious a method of providing breathable gas to a patient by monitoring/sensing a carbon dioxide level, determining if the carbon dioxide level is above or below a threshold value, if the level is above the threshold value (which indicates exhalation), the breathing gas pressure provided to the patient is decreased; and if the level is below the threshold value (which indicates inhalation), the breathing gas pressure is increased.

The prior art is also silent with regards to a system comprising, among other features, a controller and a logic for performing the method recited above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
